Human Exposure to RF EMFs by cell phones, Wi-Fi or smart meters is governed by Health Canada’s Safety Code 6 in Canada and the FCC in the United States. Safety Code 6 and the FCC use the same scientific standards as other international bodies. Even though safety standards on human exposure to radio frequencies are based on decades of scientific literature, the mechanisms linking the frequencies to adverse health effects were admitted to be missing. Safety Code 6 states “The predominant health effect to be avoided is the unintentional stimulation of excitable tissue as is the heat effect.” Experimental studies have shown that induced electric fields and currents can lead to nerve and muscle depolarization. Depolarization is a normal function but not by an EMF trigger for human disease. An example of intentional stimulation of tissue is medical imaging like an X-ray in an imaging environment, intended position of use and other exposed parts of the body protected.

The test adopted by the FCC, Safety Code 6 and others is the Specific Absorption Rate (SAR). The name itself is alarming because it is an admission that RF energy is being absorbed when there is zero absorption of any levels of RF EMFs. Here is the archaic test method used for absorption rates and mechanisms missed globally.

Specific Absorption Rate (SAR)

Here is a picture of the test used for RF EMF exposure to cell phones, Wi-Fi and smart meters.

The bracket holds the cell phone in the intended position of use. The highest power density is measured at the base of the antenna and the point is pointing to the small localized area of the skull thought to be radiated.

The white arrow on top of the head highlights the hole in the head where the model is filled with fluid stimulating tissue. There is a temperature probe inside the hole to measure “thermal” or “near thermal” effects on biologic systems. Watts/kG is used for amount of absorption.

Wi-Fi exposure for children, teachers, adults and pregnant women is considered safe 24/7 because the wireless computer or other portable devices aren’t held against the head like a cell phone.

Wireless exposure to smart Meters is considered safe 24/7 with distance because the meter is not held against the head like a cell phone.

Here is a link for the Specific Absorption Rate testing, http://www.emagazine.com/archive/05/05/06.html

In order for frequencies to cause adverse health effects, it has to be substan-
tiated how the frequencies interact with biological sys-
tems. When you see and read the above testing used for exposure to wireless fre-
cuencies, you can see the missing mechanism: safety standards that link the frequencies to adverse health effects.

Cell phones, wireless computers or portable devices states 60 Hz for electrical compatibility. The electrical grid, the appli-
cations and devices would not work safely or efficiently without that compatibility. Electromagnetic compatibility is very important with smart meter frequencies interact-
ating with human or other bio-
logical systems.

A Texas utility named Oncor replied through their lawyer the area average cov-
ered by each smart meter router was 2 square miles. The average area covered by each collector was 125 square miles. That means almost everything within the coverage area of an average smart meter is exposed.

Another critical mech-
anism missing in the Specific Absorp-
tion Rate is limits of exposure were developed without incorporating the electrical properties, millions (billions) of frequencies and vulnerability of biological systems. People were treated as meat heating and lower frequencies didn’t heat tis-
tue, so were called non ther-
mal effects. You can now measure and frequencies and electrical information out of an elec-
trical equation. The emission would be incomplete.

Dangers of Wireless Smart Grid

The flawed SAR test method was used by Public Health Alert www.publichealthalert.org Page 1

Utilities Commissions (PUC) and utilities for their repre-
sentation of safety or savings with the wireless smart grid.

Distance from the meter is presented as keeping people safe from frequency expo-
sure.

Electrical Compatibility

The electricity in our homes or used by industry has a frequency of 60 Hz in North America and the inspection plate on appli-
anes or devices states 60 Hz for electrical compatibility.

The electrical grid, the appli-
cations and devices would not work safely or efficiently without that compatibility. Electromagnetic compatibility is very important with smart meter frequencies interact-
ating with human or other bio-
logical systems.

by Dr. Rashid A. Buttar, D.O.

Our bodies are composed of 75 percent to 80 percent water. Drinking enough water helps the plant and animal cell and even the planet itself is 75 percent to 80 percent water. Do you think the Creator is trying to tell us something about water?

Notice I didn’t say “tea” or “lemonade”. At least once a month, someone tries to use the logic that tea or lemonade is somewhat water. But it’s not. It never replaces the purity of natural water. If the Creator had wanted us to be 75 percent to 80 percent coffee, He’d have made us that way, and not invented the drawbacks of drinking coffee later.

Pump Up the Volume

When it comes to water, we need to take the hint from the Creator and immediately increase our consumption. How much? My rule is simply to calculate one-half to one-inch increase in your weight. For instance, if you weigh 150 pounds, you need to drink between 75 and 80 ounces of water each day. The idea is to get an idea of how much water this is, which is a half-gallon is equal to 64 ounces of water. So, for a 150-pound individual, you’d want to consume a little more than a half-gallon to three-quarters of a gallon of water per day.

For most people that’s going to seem like a task, but believe me, once you do this for thirty days, you won’t be able to stop. We’re never all in a chronic state of dehydration. If we approach the ideal the ratio that the earth needs to maintain a balance of water, and you’re in this world, don’t get caught into thinking you can take sense to consume an amount of water that would, at the very least, equal the same ratio of water on the planet.

Luckily, the human body is very intuitive despite the mind getting in the way. So you don’t have to take my word for it; listen to your own body. The more water you consume, the better your body will feel. Every single function, from digestion and elimination right down to the electrical impulse exchange between cells, will become more efficient. Drinking this much water will be difficult at first, but you should begin

building up to your appropri- ate level. Ultimately, you’ll sat- urate and recharge your thirst receptors, and when that happens, your body will begin craving water. Trust me. Once you hit your appropriate water consump- tion level, maintain that level for thirty days. Then, try to stop drinking your water. Your body won’t let you stop. It’s finally being rejuvenated with its most essential compo- nent and it’s not about to give it up. That’s when it becomes easy because now you’re simply just fulfilling a craving.

Which Water?

If oxygen is the breath of life, then water is the blood of life. With something that important, you definitely don’t want to be drinking just, especially tap water. In fact, stay away from tap water immediately! This is especially important if you live in and around a major, urban area. Most urban water has added toxins, including fluo- ride and chlorine, among others. Our primary goal is to destoxify. Well, one of the easiest ways to reduce a toxic load is to interrupt the supply of that toxic load back inside your body. Keep the garbage from com- ing in at this stage by elimi- nating toxins from your body. There are plenty of toxins in tap water.

Now, don’t be lulled into a false sense of security by thinking that all water that you do to drink bot- tled water. Statistics show that 70 percent of bottled water comes from a municipal water supply and was just fil- tered and put into a plastic bottle. So bottled water, although a bit better, is not that much better and certainly not an option to consider. If you can’t drink the water from your own faucet, please don’t drink water that has been consumed and where can you get it? Who would have thought that something so simple and as pure as water could be so complicated! The best solution is to have purified water, and each shelf are overflowing with various water products.

There’s water which is full of toxic metals, water fortified with vitamins, ionized water and even flavored water. There are water comes from glaciers, some from springs. Some even more interesting to think of is a tricking faraway places. A lot of them carry fancy names that contain detox, ionized, alkaline, earth water, water, aqua, crystal, clear and pure to convince you that’s what that in that plastic bottle is true water.

Think again. Many TV newsmagazine shows have featured profiles about the scientific analysis and testing on many of these products. The shocking part is that there are different names, many of them contain nothing but tap water, but you’d have to find yourself three blocks and loaded up on your own tox- in-free charge of the con- venience of your own home.

Would the safe answer be to drink distilled water?

There are a lot of proponents of distilled water who say that it’s the best choice because it’s the only true “pure” water available. Distilled water comes from boiling regular water. The steam condenses on recepta- cles above the boiling water, is cooled and then bottled. It contains only hydrogen and oxygen. The solids and impu- rities are all left behind as waste. The operation of distilled water, however, claim that due to the proper- ty of hypo-osmolarity, dis- tilled water can actually leach important minerals from your body. This is a little like a magnet and pulling the minerals out of our sys- tem. But if I can believe this, I can easily believe this. Of course if I necessarily agree with this rationale, but I haven’t the knowledge of fact, I’m not going to say. Regardless, I don’t recom- mend distilled water, since it’s absolutely impossible to find or drink in nature. Even when rainwater comes into contact with the earth, it mixes with natural minerals. The other risk of the majority of polluted water is polluted with the acids found in our envi- ronment. Bottom line, if dis- tilled water is the only clean source of available water you have, simply add a pinch of sea salt to the water and you’ll have remineralized it.

Water Filter Facts

The best type of water is that which has been detox- icated and still contains its important minerals. The best source of water is filtered water from a reputable filtration system--not to be mistak- en with water softeners or deionization. Water softeners that you are imprinting on yourself. And the water in your body is conducted by water. So don’t be fooled by the idea that somehow you can get the water you really want! Not just the water you take into your body, but also the water that’s already in your body. It’s listening.

There’s more to come on the

Public Health Alert

The PHA is committed to research- ing and educating the public on the human body and other chronic illnesses in the United States. To help us continue our forces with local and nationwide support group leaders. These groups include: PHA Home Health News, Multiple Sclerosis, Leukemia & Lymphoma, FIBROMYALGIA, Huntington’s Disease, Cystic Fibrosis, and various other illnesses of unknown origins. PHA is committed to research and awareness about these illnesses. Your public service. We ask that you make sure that anyone struggling with these diseases has proper sup- port groups, including physically, spiritually, and medically.

MEDICAL PERSPECTIVES

Public Health Alert

The 9 Steps program is a breakthrough process designed to do 3 main things:

- Help you discover, understand and ACT upon the most powerful methods for defending your body against toxic threats from your body...
- Shift your mind so you feel united and eager to make the necessary changes in your life and...
- Radically transform your mood, confidence and sense of well-being.

There’s a reason why doctors, athletes, and celebrities all across the country are praising The 9 Steps to Keep the Doctor Away – because it WORKS.

Now it’s your turn… let this revolutionary guide help you transform how your body looks and feels forever!
Do you suffer from a neuromuscular disease?

MitoSynergy may help you to improve your quality of life and take control of your pain. With a one of a kind blend containing the patent pending Cunermuspir Complex, MitoSynergy may dramatically improve your energy, sleep, inflammation, motor control, pain management and muscle strength.*

Life After Lyme and Other Chronic Illness: What I Know For Sure

by Amy B. Scher

As 2013 starts, I have more to be thankful for than ever. Years ago I thought I’d never make it to age 30. I couldn’t imagine a way out of the lifestyle that I was living, the pain of every moment of my life, the lost life, the pain of every moment of every day. Years ago I thought I’d never give back now—50 years from now.

I now know for sure:

1. You will be ok, and probably even better than that. It will feel like you won’t and that feeling will linger for days and hours and years maybe. But when you least expect it, it may simply pass. Or you may just learn to be ok during the times you doubt it ever will. Close your eyes and imagine the storm of all your suffering like the wind. Wind always, always moves. And this time in your life-full of all it is this very second, will pass too. When it is ready, be there, completely willing to let it go.

2. You will feel misunderstood, but it’s for a purpose. Part of healing, emotionally and physically, is un-plugging from judgments and attachments of what other people think of you and what you think of yourself. You have to feel misunderstood to work through why it doesn’t really matter if you are. You have to find a place in time where you throw up your hands in celebration and say “This is me!” Some will love you and some will leave you, but when you finally arrive at that point, you will be free in a way you’ve never known.

3. You will learn to let go. You have to in order to move forward. You will one day see that all that you tried to control and analyze and make sense of only tied up your healing energy. Feeling safe in the flow of life is essential to your health. It will probably be the hardest thing you do—to surrender to life instead of fighting it. But when you succeed, you will find a new kind of safety that can never be taken from you. And with that, you will truly begin to heal.

4. You will learn you have more power than you think. You will realize that the only person victimizing you when you have the victim mentality is yourself. You will come to see that even though you might feel powerless, there is always something you can do to move yourself forward. You have to choose that something wisely though. It is not regurgitating your symptoms to everyone you meet or writing angry letters to all the doctors who don’t understand your disease. Wasting energy to make a point is robbing from your healing.

It won’t be easy, but it is your job and until you are accountable for that job, you will always be waiting for someone else to fix you. As I learned, even through my stem cells transplant - the most drastic of medical treatments - the cure never comes in a treatment or a doctor or the latest trend. They are all simply steps in the process. It never comes by focusing on all the wrongs in your life. It comes when you decide, despite all that has gone wrong, it is up to you to heal anyway.

5. You will become someone you truly love and accept. After you have learned to see the hard moments like the wind, made peace with being misunderstood, learned to let go, and have taken your power back, you will find a self-love for your ever sparkling, kick-ass self that you didn’t have before. You will understand and appreciate all that you went through and see why it had to happen that way. You will admit things to yourself that you denied before, acknowledge your role in your illness, and smile at how far you’ve come. You will stop seeing yourself as a person who suffers and start seeing yourself simply as a survivor that is ready to move on.

I wrote my book, This Is How I Save My Life, I write: “...You finally realize that you do heal was more than just years of suffering. It was the metamorphosis into that which you were always meant to be.” May you use this time as a vessel to become all that you ever hoped to be. May you shed the layers, beliefs and choices that are holding you back. May you experience everything, including illness, as an adventure. May you embrace it in a way that helps you grow bigger and brighter. May 2013 be YOUR year.

About the Author:

Amy B. Scher is the author of This Is How I Save My Life - A True Story of Embryonic Stem Cells, Indian Adventures, and Ultimate Self-Healing (January 2013). With a history of chronic illness, Amy set out to discover the foundation of healing. She is an expert in mind-body-spirit healing with offices in Los Angeles and Monterey, California. She uses energy therapy techniques to help those with chronic illnesses and those in need of emotional healing to identify, release and move on. Amy is an Ordained Minister of Holistic Healing. She is a frequent contributor to healthcare blogs and has presented to groups including the Department of Psychiatry and Behavioral Sciences at Stanford University, as well as the self-created motto: “When life kicks your ass, kick back.” www.AmyBScher.com www.SaveMyLife.com
A New & Living Way

by Joan Vetter

Finally it seems like my war on the white dust is over. A thin layer seemed to blanket everything in our bedroom. Our grandson Micah just replaced the carp- pet and some outdated little white tiles in our master bath with new ceramic floor- ing. It looks beautiful now, but as anyone who has gone through remodeling knows it is pretty messy during the process.

We discarded outdated clothes or things that no longer fit. We got rid of sour milk or moldy bread. But somehow we feel we can’t touch the religious ideas passed down to us by parents or our church even if they are no longer working for us.

I remember so clearly when I had an encounter with the living God. It was birthed from frustration and questioning. I poured out my doubts to my Methodist Minister, and all he did was smile at me and say, “I will pray for you and the Holy Spirit will show you the truth.” Just a few minutes later my room filled with God’s glory and I knew what I was reading in the book of John was true. The Bible calls this being translated out of the kingdom of dark- ness and into the kingdom of light. However, after years of studying the Bible and prayer I realize more than ever there are still things I need to discard in my belief system to make room for truth. In the same way that Micah couldn’t just put down the ceramic tile on top of what was already there, we need to do the messy work of demolishing the old. Contentment is usual- ly viewed as a good thing, but if we are content with our old ways we may be missing the new and living way Jesus speaks about. We may need healing, but we’ve been taught God heals some and not others, or that He heals in a certain way. Then one day we are reading John 5:9 where a certain man is lying next to a pool of water, waiting for someone to put him in. Jesus asked him a startling question, “Do you want to be made well?” He does not say a quick “yes”. Instead he answers with excuses. Jesus simply instructed him to get up and walk. So the old mindset of needing the angel to move the water before he could get in and be healed was replaced with the new and living way led by the Lord Himself. The Holy Spirit began to tug on our heart with the thought perhaps we need to stop living with excuses.

Actually, what I am sensing today after forty six years of knowing the Lord, takes me right back to the beginning. Yes, I have heard some wonderful teaching. Yes, I feel I have “grown” wiser about the Lord. But, the foundation of it all has to be what I experienced at the very onset - the presence of the living God.

For instance Joshua was Moses’ understudy. When Moses died, God instructed Joshua to cross over the Jordan with all the children of Israel. Joshua had seen God part the Red Sea under Moses’ leadership, but he couldn’t rely on yest- erday’s miracle.

The key for Joshua, and for us, is the presence of the living God. He couldn’t just believe that God could part the sea the same way He did before. Joshua need- ed to hear God speak to him and say, “As I was with Moses, so I will be with you. I will not leave you nor forsake you.” In the entire sce- nario, God was speaking instruction and Joshua was hearing and relaying it to the people.

Today so many voices contend for our attention. It is our spiritual life preserver to learn how to hear His voice among all the others.

Poetry of Clarissa Shepherd

Building Code Compliance

Buildings are designed for efficiency in building codes, frequencies going through structural components and fire separations will cause molecules to polarize (change direction) this affects the speed of the frequencies. At 900 MHz, it equates to a measurable signal so that the chance of a heart attack will increase. The electrical reality dictates otherwise. Qualified and skilled technicians are needed to ensure that the electrical reality is met. Remember, the microwave is burning from inside the building. This can’t be where we should be. There’s hardly anyone on this path of the mind who can move forward. We’ll be together to show the path.

Path of Chronic Illness

Walk with me? First step ahead. We’ll talk as we go.

Let’s take the path less trav- eled. They’ll be few that we know. Let’s try to remember, what were we doing? What were you doing? Where were you in your life? What kind of people are you? Can see you as you go.

It started so innocent. Seemed only a short jaunt. This new path that we’re on, seems to have some kind of a taunt.

Look behind us. Friends are lagging as we travel. They don’t seem to want to go. We must stop working, end a career, halt our life as we go.

Do you feel afraid, unsure, confused? We’re going down a winding road now. Hold my tightly.

Billions of dollars of electrical energy costs are wasted responding to the symptoms of buildings being radiated by solar EMF. Non-ionizing electromagnetic energy is not being addressed or saved by smart meters and there is no super heating the atmosphere, contributing to severe weather conditions. Water is refrigeration and using 100s of watts of power per hour, money for the Texas Senate and critical care.

Here is a link to testify for this:
http://www.thermoguy.com/pdfs/EMF_in_Medical_Academia.pdf

Adverse Health Effects

With the mechanisms reported linking the frequen- cies to adverse health effects and the 100s of square miles of known EMF coverage areas, design of wireless smart meters is very dangerous. They mechanically link to the infrastructure on the critical path home where interference with the pacemaker is a reality. It is an interview of a pacemaker recipi- ent that ended up saved from smart meter frequen- cies until they shut off his pacemaker and he ended up in critical care. You understand more, feel taunt.

This new path that we’re on, seems to be of the utmost importance as we see this way.

Walking in the Light of Your Fearlessness

Many times we feel disconnected from everyone due to chronic illness. We can’t always express how we feel to others. This leaves us frustrated and alone in a room with few people.

We reach deep inside to see a part of us that many peo- ple never need to see. We hold on tight to places in our mind that many people never need to go. We’re living a daily task, and peace can many times be a stranger to us.

Do you feel afraid, unsure, confused? We’re going down a winding road now. Hold my tightly.

In the electrical reality http://www.thermoguy.com/urbanheat.html

Meter Accuracy, Fire & Safety Installations

There have been sev- eral complaints on the accu- racy of meters and electrical billings. Were the meters and wireless equipment tested for electrical installation of the original meter which may be defective? Unqualified electrical pro- fessionals aren’t qualified for the scope of work wireless installation.

Unqualified electricians will report that the frequency is not keeping people safe. An electrical re- ality which can’t be answered.

Electricity requires ongoing mainte- nance and the meter bases of homeowners have never been maintained. Existing smart meter installation replaces the safety and the microwave is burning from inside the building.

You seem to be growing into a daily task, and peace can many times be a stranger to us.

As I think of those surviving chronic illness, I am remind- ed of how brave you are. You are not your illness. You are a mighty sword, of a war- rior, ready to battle each day for your life.

You are not your harmful thoughts, for they are imposed on your mind. Yet, as we look back, those thoughts are greater than those awful thoughts and seems to understand and affect your body and life.

We stand together, for our pain. We each give to the other the strength to move forward, and they rise rather lie down and quit. You show your courage and courageous breath you take, every obstacle you overcome, each time you learn new ways to cope.

You are fearless, in even in knowing the mechanism forward, in spite of it. All of your adversity has rebuit you, mind, body and spirit.

Allow the reality of this truth to fill up your innermost being, hold you, hold you and keep us going.

You are heroes of a unique kind, taking a journey down a very winding road.

With uncertainty around us, we must move forward with the occasion with grace.

Walk in the light of your fearlessness, for you are the description of courage.
**Vacine Education**

**Under Attack: NVIC Helps Americans Stand Up & Speak Out**

by Barbara Loe Fisher

In 2013, the National Vaccine Information Center ( NVIC ) enters its fourth decade of preventing vaccine injuries and protecting the public health and defending the legal right to make voluntary vaccination decisions in America.[1] Each year during the past 30, NVIC has become more successful in achieving its mission. With that success has come more fierce opposition by politically powerful companies, associations and special interest groups allied with drug companies. NVIC today can no longer allow these forces to censure truthful vaccine information and strip parents and citizens of our rights to protection from public health laws.

**NVIC Ranks High As Trusted Information Source**

At a recent federal advisory committee meeting, we learned that public opinion surveys reveal that NVIC ranks as one of the most trusted sources of vaccine information among Americans from product to vaccine, and also among those who do not.[2] This means that our small charity and the well-referenced information on our website at NVIC.org is helping to inform the health decisions made by millions of Americans.

This is a huge accomplishment and it would not have been possible without 30 years of loyal support by tens of thousands of parents, grandparents, doctors, nurses and students coming from every single state and every walk of life who offer donations to NVIC every year.

**No Liability for Drug Companies & Doctors**

A lot of people still don’t realize that Congress and the U.S. Social Security Court have completely shielded drug companies and doctors in America from product liability and malpractice lawsuits when vaccines injure or kill anyone. Even pharmaceutical corporations and medical trade groups are not satisfied with total liability protection and no accountability. They also want the power to legally force 350 million Americans to buy and use every single vaccine that Big Pharma produces and public health doctors demand - no exception.

** NVIC Attacked for Defending Informed Consent Rights**

 NVIC and our uncompromising defense of informed consent to medical risks, including vaccine risk taking, has stood in their way for 30 years. And now the reason why are witnessing vicious assaults on NVIC and courageous state legislators who are trying to protect their right to know and freedom to choose how they and their children will stay well.

At this time last year, NVIC was the subject of a smear campaign led by American Academy of Pediatrics officials,[3] who put pressure on Delta Airlines in a failed attempt to remove NVIC-sponsored public service announcements from in-flight health programming. This past month, another online disinformation campaign about NVIC was unleashed by forces seeking vaccination proponents to get a 15-second NVIC-sponsored digital advertisement down from Times Square.[4] It failed and our vaccine risk awareness message was seen throughout the holiday season and on New Year’s Eve.

**Big Pharma & Doctor Groups Lobby to Eliminate Vaccine Exemptions**

And this year, drug company and medical trade association lobbyists tried to persuade legislators in Vermont,[5] California[6] to remove religious and philosophical belief exemptions to vaccination from public health laws. But NVIC today is helping citizens in those states, using our free online NVIC Advocacy Portal to help organize and electronically connect their legislators and up-to-date on breaking news.

Next year, NVIC will face more censorship and well-orchestrated, well-funded assaults on vaccine exemptions in multiple states. Our parental, civil and human rights to freedom in America are in grave jeopardy.

You all have to do is ready the NVIC fact sheet descriptions posted on the Cry for Vaccine Freedom Wall[7] at NVIC.org to understand how bad it is.

**Health Care Workers Being Fired**

Children are being denied medical care if parents ask pediatricians questions about vaccine injury to a baby being injected with eight to ten different vaccines on one day. Health care workers are being threatened and fired if they don’t get an annual flu shot.

This is what one nurse posted on the Vaccine Freedom Wall:

> "I have taken the flu shot in the past and had holy ashes for weeks afterward. I started educating myself on vaccines and have not taken a flu shot in years. I am a nurse and love my job. I take every precaution in the interest of my patients, utilize hand wash, etc. I found out at a meeting yesterday that our organization’s policy has changed and that I will have to take the flu shot to be terminated from employment. I am at a crossroads and am actually thinking about leaving a job that I love because I feel so strongly about my personal freedom."

**No Vaccinations? No Prescription Medications.**

Americans needing public assistance are being coerced into either getting many vaccines against their will or being cut off from prescription medications. This is what one American suffering financial hardship had to say:

> "During this past recession, I had to seek medical care from the county public health program. I had high blood pressure and was probably due to stress. My last and final visit to that place was to refill [blood pressure] prescription, which was denied until I allowed myself to be injected with three vaccines: tetanus, flu and pneumococal.

I refused but finally consented because I was afraid of what would happen if I suddenly stopped taking the medicine. I was sick for nine days after receiving those shots. Being forced to accept vaccines under duress as an adult is a horrible feeling, a sense of freedom. Your refusal by withholding medication is just plain evil."

**No Vaccinations! No Medicare Benefits.**

The elderly are being bullied, too. A couple on Medicare described their frightening experience:

> "My wife and I are in our mid-sixties and on Medicare. We saw our primary care physician today for a routine ‘well care’ visit and were shocked to hear what our physician for over 26 years had told us to tell the doctor made it clear that he was referring to ‘new’ [federal health care program] mandates that is, if we want voluntarily to receive the pneumonia vaccine, we would be terminated from his practice! My wife and I have never felt so violated."

**Doctors Pushing More Vaccines on Injured Children**

Even parents of vaccine-injured children are being pressured to give their children more vaccines because many liability-free doctors now feel comfortable taking the risk and granting approval to vaccination. Mothers are fighting back. They fear ‘shot’ up their kids and that vaccine exemptions must be protected at all costs. One mother said:

> "My daughter is a beautiful, renders, severe,gross over 1.1 billion dollars in sales last year. We are seeing a new vaccine that almost took her life. My daughter suffered from chemical disorder and it causes her to have seizures. She is eight years old and classmates and we no longer have health insurance and no job due to what vaccine damage has taken from our family. If you think doctors are going to sign the [personal belief] exemption, you are wrong. They won’t."

**Help NVIC Help Americans Stand Up & Speak Out**

There is no time to waste. Now, more than ever, NVIC needs the financial resources to educate more Americans about vaccination and human rights in America. What you choose today will determine what happens to you, your grandchildren and every one you love tomorrow.

PUBLIC HEALTH ALERT

**Liposomal Glutathione + Vitamin C Gel**

**GREAT TASTING ORANGE!**

**EFFICACIOUS & ECONOMICAL**

Our product formulation team has developed a new glutathione delivery system: efficacious liposomal glutathione and vitamin C in a very pleasant tasting natural orange gel. No need to mix with juice. Just squeeze onto a teaspoon and enjoy.

Each serving provides 450mg of reduced glutathione plus 50mg of vitamin C, with both nutrients carefully encased within the protective liposomes. Packaged in an eight ounce squeeze tube with 48 servings per tube, the patient’s cost per serving is reduced.

**PROVEN STABLE IN HIGH HEAT**

We contracted with a third party lab to subject Tri-Fortify™ Orange to the most extreme conditions: 104° F and 75% humidity for 90 consecutive days. The result: product met & exceeded the nutrient content on the label.

**JOSEPH BURRASCANO JR., MD**

“The new delivery system and pleasant taste make Tri-Fortify™ Orange an outstanding product.”

**PHYSICIANS:**
